

The ultimate urinal accessory

Malodour and poor hygiene in the men's restroom is an age old problem that together, with any evolution in urinals, has never really been addressed adequately.

Almost every urinal device on the South African Market is ineffectual in as far as anti-splash, treatment of odour (not masking of odour) and eradicating unwanted and harmful microorganisms.

ECO LOO FEATURES AND BENEFITS WHEN IN USE

- Eco Loo reduces back-splash by as much as 90%.
- Eco Loo releases a pleasant fragrance that keeps a urinal and the surrounding areas smelling fresh for up to 30 days or 2000 flushes (depending on the frequency of use).
- The combination of a bio-enzyme tablet will prevent malodour from stale urine for up to 30 days by degrading and eliminating organics found in the urinal, and drain lines.
- Unique ribbed and serrated-edge design prevents even the smallest debris falling into the urinal trap causing potential drain blockages.
- Innovative angled pebble design keeps urinal area clean & inhibits unwanted splash back.
- Safe installation & disposal - product and all its packaging can be fully recycled.
- Activated fragrance burst increases fragrance lift on contact with fluid.
- The pebbles/stones are target orientated allowing better aim for user.
- Combined use with Eco Ultra allows you to discontinue your conventional sanitizer.
- Universal design fits all styles of urinals.
- The serrated edge and rib design allows urinal to flush quickly.
- Unique anti-slip polymer feature keeps the device in an optimum position in the urinal.
- Eco Loo is suitable for both conventional urinals and waterless urinals including trough type urinals.
- The most cost effective product on the South African market.
